## Media Board Plus RGB 16PXL

Project: \_\_\_\_\_

Type: \_\_\_\_\_

IP20 Indoor

DMX 512

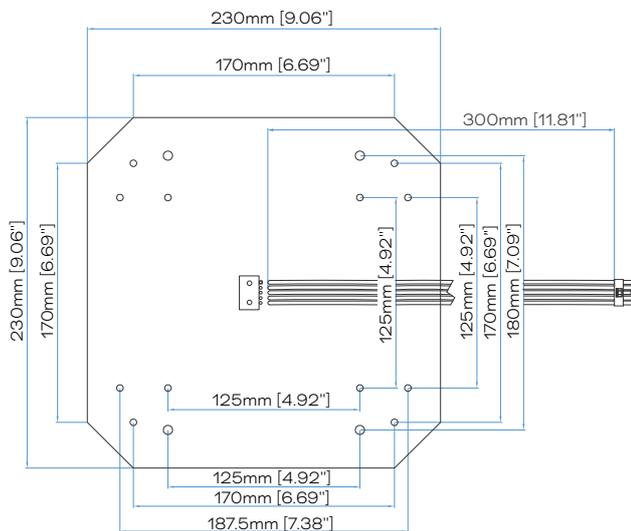

E:PIX

The Media Board Plus RGB 16PXL features color-calibrated, controllable ultra-bright SMT LEDs on a 4 x 4 matrix with a 62.5mm / 2.5" pitch, ensuring precise white balance and delivering vivid and vibrant colors. Use the Media Board Plus for dynamic low resolution media displays, backlighting and lighting effects that blend into the fabric of the environment to bring it to life. Paired with our Add-On Boards, or our higher density Media Board Plus RGB 64PXL, the Board family provides expanded creative possibilities for even more stunning and intricate visual effects.

### Features

- 16 individually controlled RGB Pixels DMX / e:pix Control
- Auto-Addressing

| Intensity Dimming Range | 0 - 100%        |
| Power Supply            | 24V DC          |
| Addressing Options      | Auto-Addressing |

**LED CHARACTERISTICS** Because LEDs are semiconductor devices, their performances are subject to inherent variability commonly found in semiconductor industry. To improve consistency in performance across the same product, LED manufacturers "sort" LEDs into bins according to different preset parameters, such as forward driving voltage, illumination, etc. Whereas binning is a sorting function, it is not a correction process. Inherent variability in the manufacturing process results always in different binning distributions according to different production lots. Traxon uses automatically binned LEDs on its products, thereby minimizing output variations within the model range.

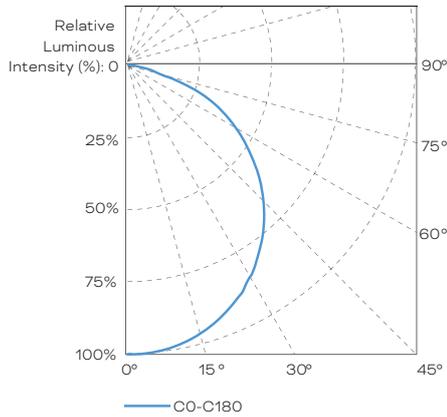

As with all electronic devices, LED output degrades over time - a term called lumen depreciation. This also explains why it is nearly impossible to expect photometric performances of two LED products with different service life spans to be the same. The rate of LED degrade is a complicated function of many factors such as operating efficiency, duration of continuous operation, and more significantly, environmental conditions (ambient temperature for example). If allowed working under optimal operating temperature range and with good ventilation, LED devices enjoy long service lives over conventional light sources. When using/installing LED devices, care should be taken to ensure that the devices will operate within the operating conditions specified in respective product literature.

This product contains a light source of energy efficiency class G to Regulation (EU) No 2019/2015. Lumen measurement complies with LM-79-08 standard. Lumen maintenance is calculated based on LM-80 compliant measurement.

### Source Specifications

### Board Mounting

#### Mounting Pattern:

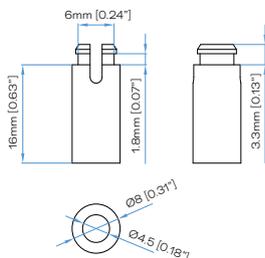

- A: : Ø6mm; 180mm (I) and 125mm (II); for usage with the supplied spacers and screws.
- B: Ø4.3mm; 125mm (I) and 125mm (II); for Board holder drill version and punch version.
- C: Ø4.3mm; 170mm(I) and 170mm (II); for Board holder drill version and punch version.
- D: Ø4.3mm; 125mm(I) and 187.5mm (II); for Board holder drill version and punch version.

#### Mounting Multiple Boards

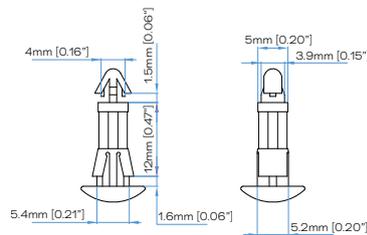

#### Mounting Accessories

DA24202070555:  
BOARD MOUNTING KIT (100x SPACER, 100x SCREWS)

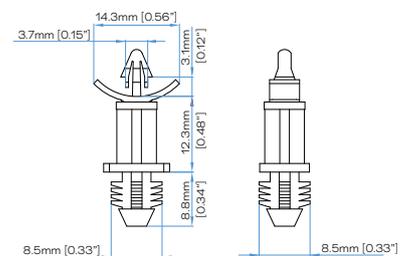

Board mounting kit screw and spacer are suitable for all boards (included).  
If additional needs, they can be purchased separately.

DA24102170055:  
BOARD HOLDER, PUNCH VERSION (1.5-2MM SHEET METAL;  
REQUIRES HOLE Ø=5.5MM), 12MM (100x)

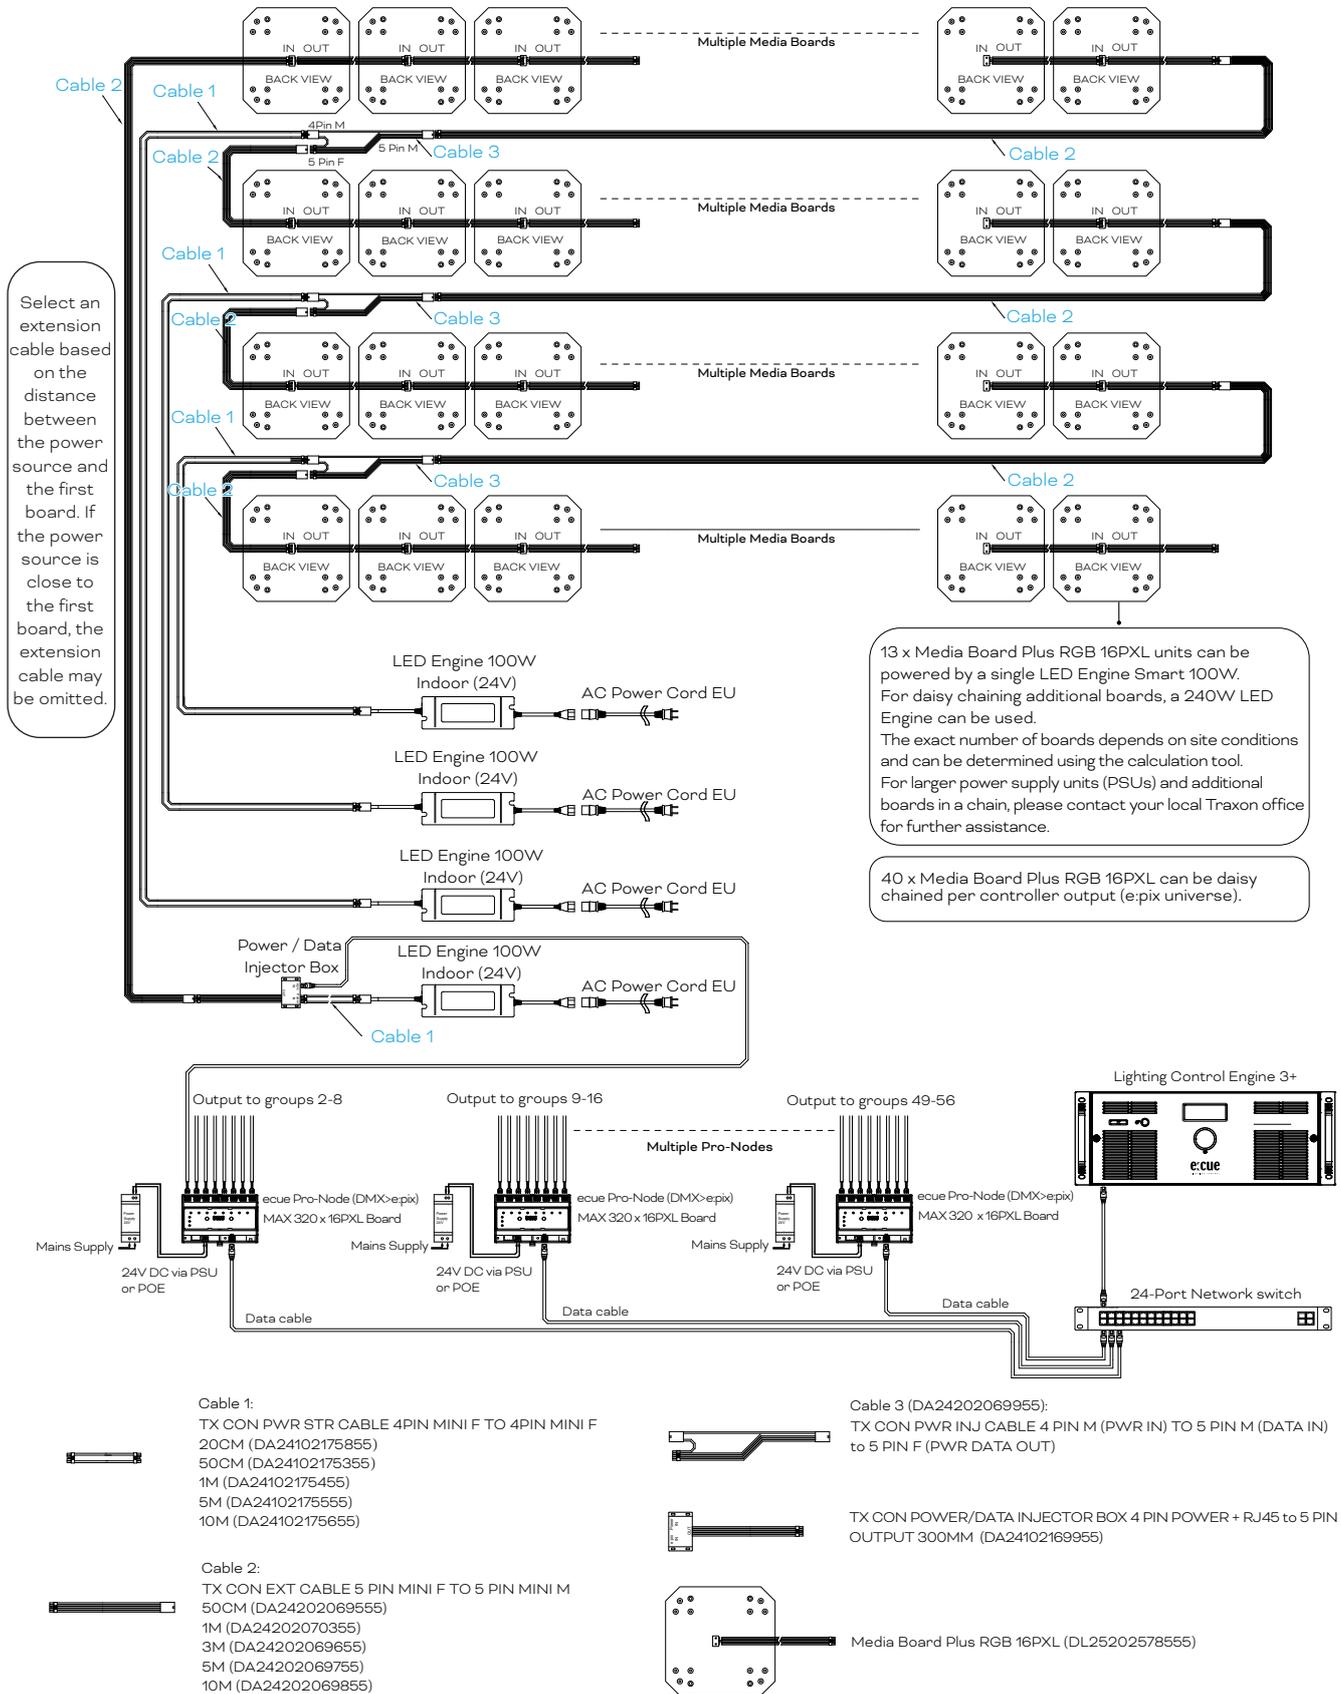

Board holder punch version for sheet metal, it is not suitable for add-on board/strip (by others).  
If additional needs, it can be purchased separately.

DA24102170155:  
BOARD HOLDER, DRILL VERSION (WOOD; REQUIRES  
HOLE Ø=8MM, >9MM DEEP), 12MM (100x)

Board holder drill version (Ø4.3mm/Ø0.17") for wood, it is not suitable for add-on board/strip (by others).  
If additional needs, it can be purchased separately.
