

TRAXON Plus⁺

Media Board Plus RGB 64PXL

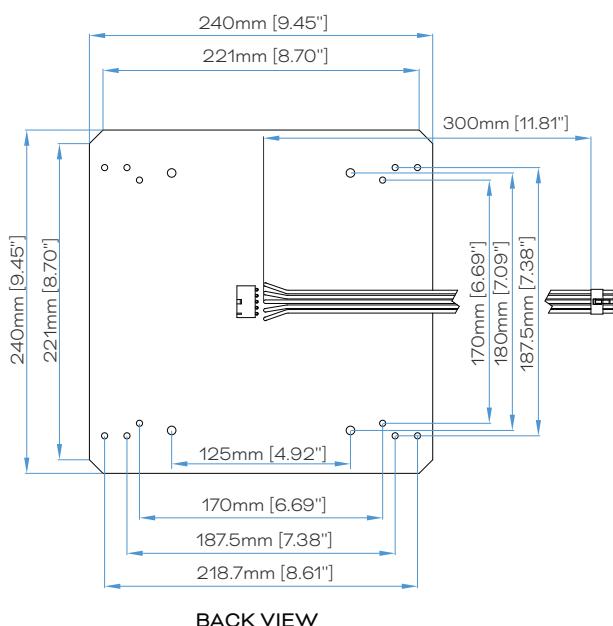

The Media Board Plus RGB 64 PXL features color-calibrated, controllable ultra-bright SMT LEDs on a 8 x 8 matrix with a 31.2 mm pitch, ensuring precise white balance and delivering vivid and vibrant colors. Example applications encompass architectural highlights (on walls, floors, counters, decorative elements) for backlighting in light boxes or stretch ceilings, as well as in light panels, to make an impact at trade fairs.

This product is intended for use in high-quality colored light applications.

LED CHARACTERISTICS Because LEDs are semiconductor devices, their performances are subject to inherent variability commonly found in semiconductor industry. To improve consistency in performance across the same product, LED manufacturers "sort" LEDs into bins according to different preset parameters, such as forward driving voltage, illumination, etc. Whereas binning is a sorting function, it is not a correction process. Inherent variability in the manufacturing process results always in different binning distributions according to different production lots. Traxon uses automatically binned LEDs on its products, thereby minimizing output variations within the model range.

As with all electronic devices, LED output degrades over-time – a term called lumen depreciation. This also explains why it is nearly impossible to expect photometric performances of two LED products with different service life spans to be the same. The rate of LED degrade is a complicated function of many factors such as operating efficiency, duration of continuous operation, and more significantly, environmental conditions (ambient temperature for example). If allowed working under optimal operating temperature range and with good ventilation, LED devices enjoy long service lives over conventional light sources. When using/installing LED devices, care should be taken to ensure that the devices will operate within the operating conditions specified in respective product literature.

This product contains a light source of energy efficiency class G to Regulation (EU) No 2019/2015.

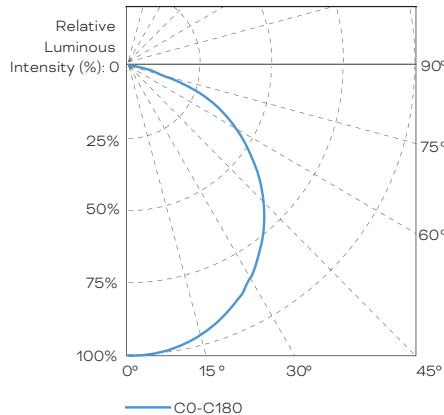

Lumen measurement complies with LM-79-08 standard.

Lumen maintenance is calculated based on LM-80 compliant measurement.

Board Mounting

Mounting Pattern:

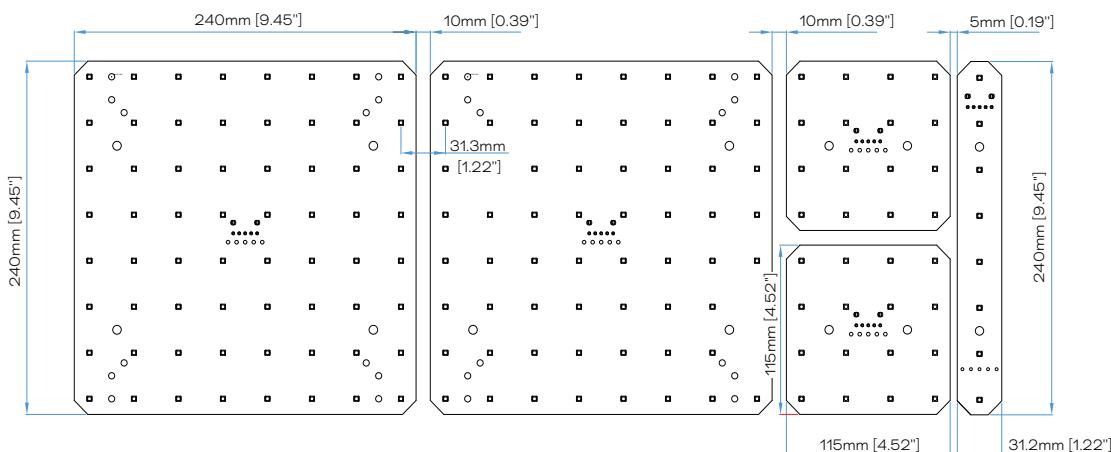

A: Ø6mm; 180mm (I) and 125mm (II); for use with the supplied spacers and screws.

B: Ø4.3mm; 170mm (I) and 170mm (II); for Board holder drill version and punch version.

C: Ø4.3mm; 187.5mm(I) and 187.5mm (II); for Board holder drill version and punch version.

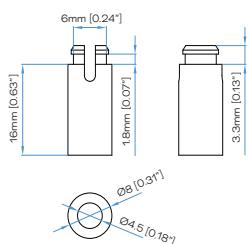

D: Ø4.3mm; 187.5mm(I) and 218.5mm (II); for Board holder drill version and punch version.

Mounting Multiple Boards

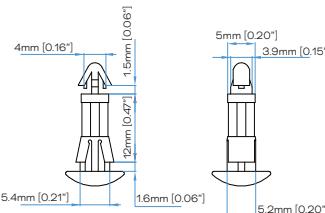

Mounting Accessories

DA24202070555:
BOARD MOUNTING KIT (100x SPACER, 100x SCREWS)

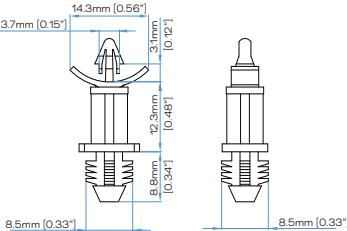

Board mounting kit screw and spacer are suitable for all boards (included). If additional needs, they can be purchased separately.

DA24102170055:
BOARD HOLDER, PUNCH VERSION (15-2MM SHEET METAL; REQUIRES HOLE Ø=5.5MM), 12MM (100x)

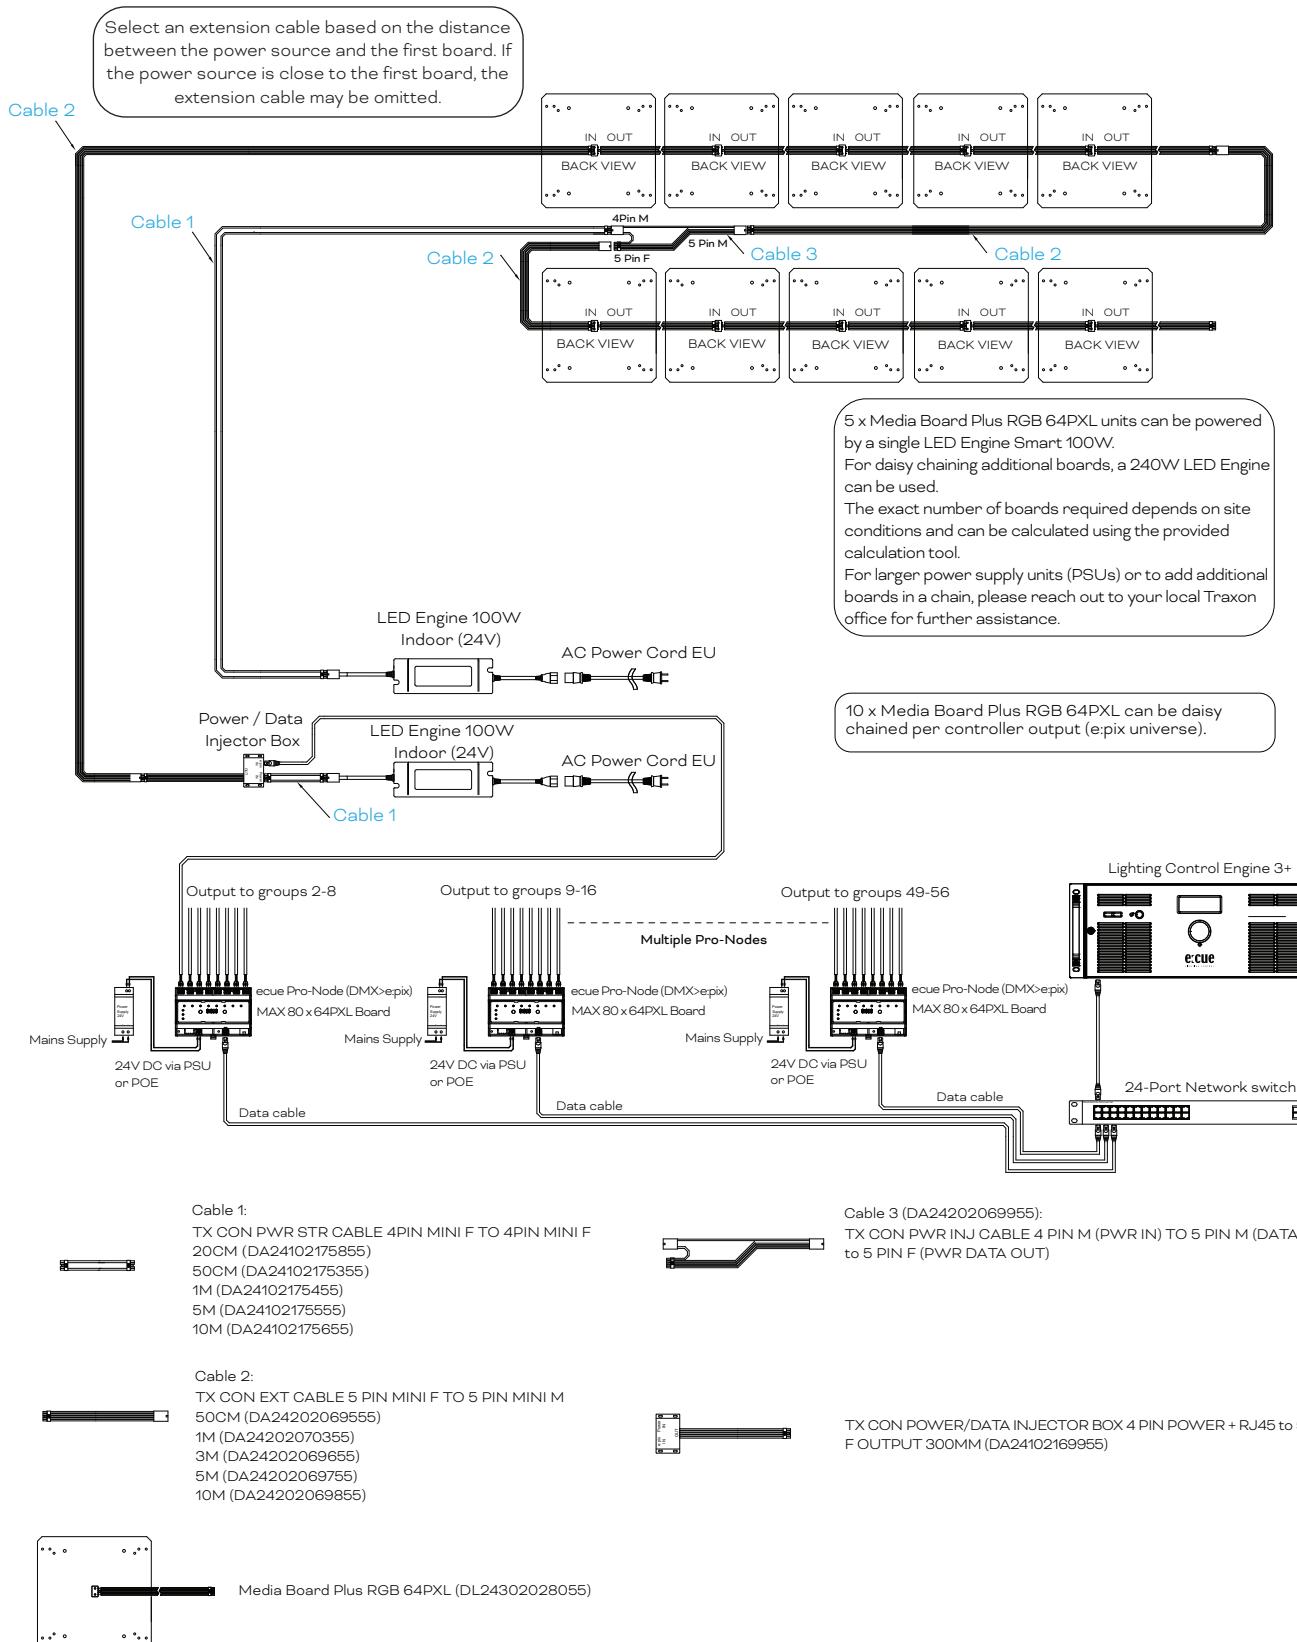

Board holder punch version for sheet metal, it is not suitable for add-on board/strip (by others). If additional needs, it can be purchased separately.

DA24102170155:
BOARD HOLDER, DRILL VERSION (WOOD; REQUIRES HOLE Ø=8MM, >9MM DEEP), 12MM (100x)

Board holder drill version (Ø4.3mm/Ø0.17") for wood, it is not suitable for add-on board/strip (by others). If additional needs, it can be purchased separately.
