

Project: _____

Type: _____

Allegro Dot XS DW

Allegro Dot XS is the newest and smallest member of the intelligent Allegro Dot family which enables longer chains of illuminated Dots. The Allegro Dot XS is ideal for outdoor media applications, where it can be integrated seamlessly into the facade, or it can be installed to float in the air with our highly transparent mounting options. Each system is driven by the PXL Distributor Pro 8 (PDP8) which integrates power and data into one unit, reducing the space required for installation components. Each PDP8 can support up to eight Allegro Dot XS outputs with e:net IN and OUT.

Product Specifications

Models	DW Clear	DW Diffused
Number of Pixel	Max. 80 per string Max. 640 per system	
Light Source	1 Warm White LED (2700K) and 1 Cold White LED (6500K) per dot	
CRI	>80 for White LED	
Luminous Flux ¹	26 lm	22 lm
Brightness ¹	9.4 cd	4.3 cd
Beam Angle	115°	175°
Cover Lens	Clear UV Stable PC	Diffused Dome UV Stable PC
LED Pitch	Standard 90mm / 3.5"; 50mm / 2" to 500mm / 19.7" with 80 Dots	
Housing	Polycarbonate	
Dimensions (W x L x H) ²	19mm x 41mm x 10.6mm / 0.7" x 1.6" x 0.4"	
Weight	796g / 28oz full string; 9.5g / 0.33oz single dot with 90mm / 3.5" cable	824g / 29oz full string; 9.8g / 0.34oz single dot with 90mm / 3.5" cable
Regulatory Listing & Safety Approval	CE, UKCA, cETLus, RoHS, REACH	
Operating Temperature	-25°C to + 55°C (Other than N. America) / -13°F to 122°F (N. America)	
Storage Temperature	-40°C to + 70°C / -40°F to +158°F	
Environment	IP66 & 67 Outdoor Rated	
Humidity	0 to 90% non-condensing	

Electrical Specifications

Input Voltage	Allegro Dot XS 30V DC; PXL Distributor Pro 8 120V-277V AC nominal
Power Consumption (Typ.)	Allegro Dot XS DW: 0.5W per Dot PXL Distributor Pro 8: 10W Full system: 400W

System Specifications

Power	AC line
Control	e:net ³ IN and OUT via PXL Distributor Pro 8
Power Supply	Integrated 450W; Isolated outputs for Class2 Compliance
Addressing Options	Auto-addressing

1. Measurement per dot.
2. Per Dot
3. An Ethernet-based e:cue protocol used for communication between e:cue Engines and Interfaces.

LED CHARACTERISTICS Because LEDs are semiconductor devices, their performances are subject to inherent variability commonly found in semiconductor industry. To improve consistency in performance across the same product, LED manufacturers "sort" LEDs into bins according to different preset parameters, such as forward driving voltage, illumination, etc. Whereas binning is a sorting function, it is not a correction process. Inherent variability in the manufacturing process results always in different binning distributions according to different production lots. Traxon uses automatically binned LEDs on its products, thereby minimizing output variations within the model range.

As with all electronic devices, LED output degrades over time – a term called lumen depreciation. This also explains why it is nearly impossible to expect photometric performances of two LED products with different service life spans to be the same. The rate of LED degrade is a complicated function of many factors such as operating efficiency, duration of continuous operation, and more significantly, environmental conditions (ambient temperature for example). If allowed working under optimal operating temperature range and with good ventilation, LED devices enjoy long service lives over conventional light sources. When using/installing LED devices, care should be taken to ensure that the devices will operate within the operating conditions specified in respective product literature.

This product contains a light source of energy efficiency class G to Regulation (EU) No 2019/2015. Lumen measurement complies with LM-79-08 standard. Lumen maintenance is calculated based on LM-80 compliant measurement.

Source Specifications (Clear)

Source	1 Warm White LED (2700K) and 1 Cold White LED (6500K) per dot
Optics	115°

Candela Distribution

Light Output

Color	Luminous Flux (lm)	Center Intensity (cd)	Efficacy (lm/W)
DW FULL ON	26.0	9.36	59

Illuminance at a Distance

- Vert.Spread: 110.0°
- Horiz.Spread: 117.2°

For fc divide by 10.7

For feet multiply by 3.28

IES and LDT files are available for download from the Traxon website.

Source Specifications (Diffused)

Source	1 Warm White LED (2700K) and 1 Cold White LED (6500K) per dot
Optics	175°

Candela Distribution

Light Output

Color	Luminous Flux (lm)	Center Intensity (cd)	Efficacy (lm/W)
DW FULLON	22.0	4.25	50

Illuminance at a Distance

Center beam Lux/klm	Beam width (m)
H	
0.5m: 739	24.90m
1.0m: 185	49.80m
1.5m: 82	74.69m
2.0m: 46	99.59m
2.5m: 31	124.49m
3.0m: 21	149.39m

● Horiz.Spread: 175.4°

AL Dot XS Diffused

PXL Distributor Pro 8 (AM461810055)

NOTE: Please refer to the PXL Distributor Pro 8 datasheet for more technical details.

High Density Dot Media Solution - STAINLESS STEEL MESH GRID

NOTE: The Mounting Bracket is designed to fit to this Ferrule dimension.

Standard Mesh Grid

	Installed Mesh Pitch, x (mm)	Installed Mesh Pitch, y (mm)	Weight of MG / m ² (g)
MG15-40	45	62	937
MG15-50 (Standard)	60	77	722
MG15-60	80	84	517
MG15-70	90	105	423
MG15-80	100	117	370
MG15-90	125	125	320
MG15-100	135	140	282
MG15-120	170	175	204

NOTE: Pitch measured when the mesh grid is fully stretched.

AL DOT XS MESH GRID MOUNTING BRACKET SET (85 sets) (AM461780055)

Mounting

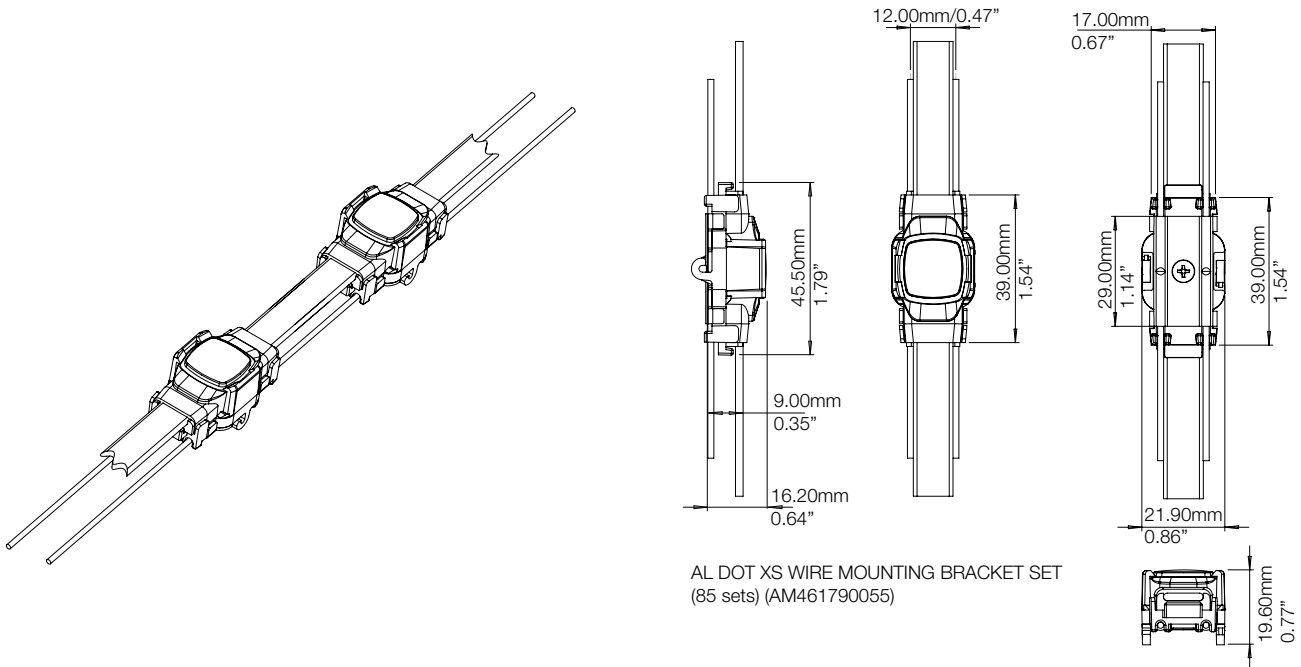

Horizontal cable run

Vertical cable run

NOTE: Please refer to the installation guide for Mesh Grid installation planning.

Low Density / Single String Installation Solution - WIRE MOUNTING

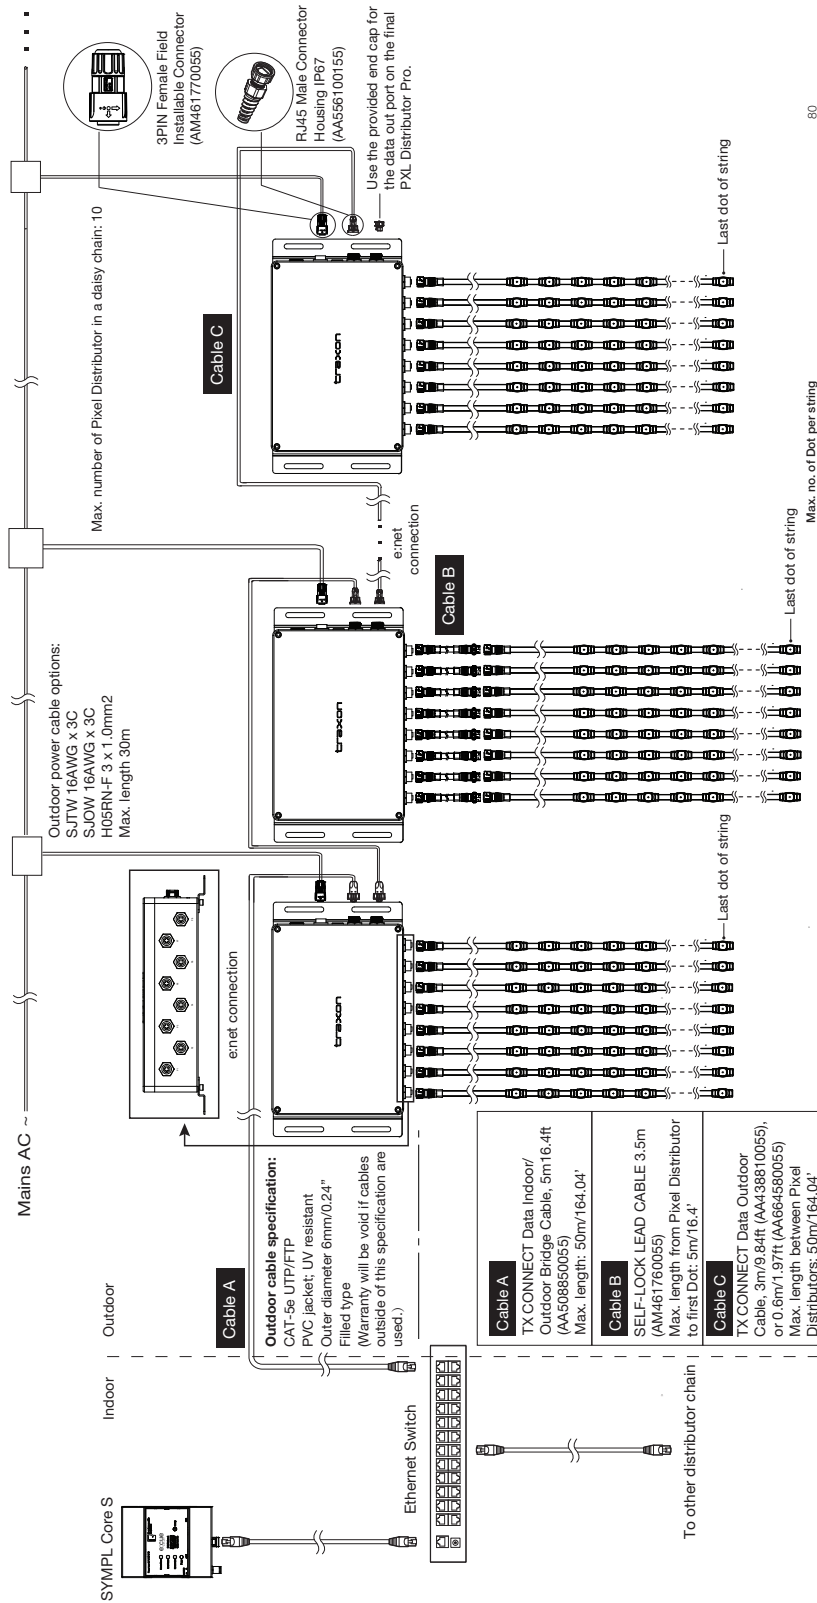

Mounting

Low Density / Single String Installation Solution - DOT CLIP

Max. no. of Dot per string	80
Max. no. of string per PXL Distributor Pro 8	8

Max. no. of channel per string	
RGEW: 320	
RGE: 240	
DW: 160	
CW/WW: 80	

Max. no. of channel per PXL Distributor Pro 8	
RGEW: 2560	
RGE: 1920	
DW: 1280	
CW/WW: 640	

CAUTION: The total length of the cable between the Pixel Distributor and the first Dot shall not be less than 1.5m/4.9ft.
