SYMPL Core Sp

e:cue Interfaces

Lighting applications are heterogenous by nature. e:cue interfaces serve to integrate many networks, protocols and third party products into e:cue solutions. They also aid in applying special control functions for fixtures, they integrate analog or mechanical signaling into the digital world and offer bridging functions. e:cue interfaces are the links to bring together the many techniques and technologies of lighting control.

e:cue SYMPL Core Sp

The SYMPL Core Sp is a stand-alone engine for e:cue SYMPHOLIGHT with SYMPL Nodes as interfaces. It executes SYMPHOLIGHT projects in small to medium-sized projects and controls all available SYMPL Nodes. As a user interface it utilizes the Action Pad of SYMPHOLIGHT with all usual web browsers. The connection between SYMPL Core Sp, external systems and the Nodes is a standard Ethernet network. Projects can be transferred to the SYMPL Core Sp from a SYMPHOLIGHT server or via its web interface. The SYMPL Core Sp can be powered by an external power supply or via Power-over-Ethernet.
