## Wilson Elser

Chicago, IL, USA

\*Images Craig Dugan Photography 2025

Wilson Elser is a preeminent defense litigation firm comprised of more than 1,400 attorneys and backed by nearly five decades of experience and a nationwide footprint. One of the firm's many offices is in Chicago, where a recent relocation has resulted in a workspace that demonstrates how architecture, interior design, and lighting can come together to create a cohesive and engaging environment.

The office design draws inspiration from the winding path of the Chicago River, creating a space that is both highly functional and visually compelling, with lighting playing a central role in the narrative. The layout incorporates both straight and curved elements throughout the corridors, elevator lobby, and core office areas. To accentuate the "meandering" concept, 490 feet of Cove Light Plus from Traxon e:cue were installed throughout the space.

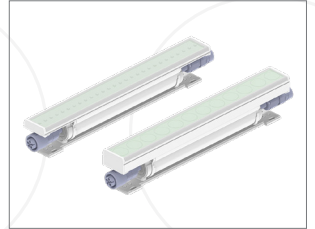

The renovated office ultimately delivers a sophisticated, efficient, and contextually grounded workplace that reflects both the identity of the firm and the character and spirit of Chicago.
